

Drum Pump for Chemical

Brand: APACO

Model:DPA200

Purpose:

The APACO have been Manufacture of barrel pumps for oil and gas and chemical industry; a truly versatile pumping solution for any fluid. Suitable for fuel, chemicals, fats, resins, paints, or food products, our electric drum pumps can handle low and high viscosity fluids, shear sensitive mediums and those with solid content. The beauty of the barrel pumps design is that they are easy to install, can be easily moved between drums and IBCs and do not require additional installation space. With some models being able to empty 99.98% of the fluid and others being used to mix as well as transfer, our range of electric drum pumps offer solutions for industrial, cosmetic, pharmaceutical and food processing applications. Working closely with the market and having extensive product knowledge, our technical sales can also provide product selection advice and help you select the right the drum pump for your application

Design of pump	for drums
For media	acids
For liquids	hydrochloric acid, phosphoric acid up to 50%, chromic acid, battery acid up to 40%, Concentrated Nitric , etc.
Material of pump	polypropylene (PP)
HEAD	26 M
Drive shaft material	HC
Immersion depth	1000 mm – Pump Tube Diameter 41 mm
Pump rate	70 l/min – With Electrical Speed Control
Scope of delivery	PP pump, with a 2.0 m PVC reinforced hose DN 19
Power	220Volt, 650 watt,50-60Hz, IP24
Weight	Approx. 6 kg
Product type	drum pumps, electric

Guaranty Term: 12 Month
