

آزمایش بررسی قطبش نور و قانون مالوس

Polarization of light and Malus' law Exp.

Required equipments for the Experiment:

Sodium lamp with 110011 housing

Photocell in plug in box 220008

Microvoltmeter 110017

Pair of polarization filter with vernier 220005

Optical bench 110008

MultiClamp(N=3) 110003

BNC Cable

Stand base, V shape 110004

Laboratory Stand 110001

Pair of half-wave Plates with vernier 221102

Pair of quarter-wave Plates with vernier 22110

Descriptions:

Producing of linear polarized light ,verifying the Malus' law and studying about the effect of an inhomogeneous environment on polarized light.

Warranty : One year

After sales service : Ten years
