

## Tris base solution

Empirical Formula (Hill Notation) C<sub>4</sub>H<sub>12</sub>N<sub>3</sub>O<sub>3</sub> Molecular Weight 122.14

### Properties

|                   |                                |
|-------------------|--------------------------------|
| concentration     | 1.5 M                          |
| Featured Industry | Diagnostic Assay Manufacturing |
| storage temp.     | 2-8°C                          |

### Description

#### Application

For use in the enzymatic determination of pyruvate using lactic dehydrogenase.

#### Caution

Contains 0.05% sodium azide as a preservative.
