

APEX

TECHNOLOGIES

Fanavariye Atiyeh Pouyandegan Exir (Apex technologies co.) is established in Science and Technology Park of Markazi Province to provide more efficient, cheaper and more compact products especially for RCAL, SCAL and EOR purposes.]Our expertise and technicians mission is 100 % customer satisfaction in the shadow of their valuable, reliable and innovative experiences, thoughts and designs with the assist of new technologies . We believed our valuable customers desired the bests!

Besides to higher quality and competitive prices of Apex Tech co., the new generation of constructed equipments is easy to use and to be carried. These innovative designs raise form our loyalty to our missions and customers to satisfy them with the best quality and the shortest period of time anywhere they are.

In brief, we are going to be:

Creative: Adhering to continuous innovation in technology we design and provide new generation of equipments required in the areas of RCAL, SCAL and EOR.

Professional: Due to valuable and dependable experiences of our technician and engineers we are going to provide more efficient, more reliable and more compact equipments which can be easily utilized and transported by one operator.

Leading: Adopting the advanced hardware and the precise algorithm of image analysis, controlling protocols and using the last technologies of hardware, new generation of compact equipments are provided.

in the light of our loyal costumers' supports.

APEX

TECHNOLOGIES

Products:

- Routine core analysis
 - Porosity measurement system
 - Under confining pressure
 - Without confining pressure
 - High pressure single pump
- Special core analysis
 - PVT
 - Matrix acidizing system
 - Core flooding system
 - Interfacial tension measurement
 - Pendant drop IFT measurement (Ambient condition)
 - Pendant drop IFT measurement (HP-HT)
 - Spinning drop IFT measurement
 - Sampling cylinder
 - Supercritical fluid system
 - Supercritical fluid extraction system
 - Rapid expansion supercritical solution system
- Accessories
 - Core holder
 - Moveable piston accumulators
 - HP-HT sapphire/quartz sight glasses
 - HP-HT sapphire/quartz glasses
 - HP-HT Valves and connections
 - HP-HT gas back pressure regulator
