

AZERBAIJAN TECHNOLOGIES

Advanced Technologies for
Condition Assessment and
Asset Management

COMPANY OVERVIEW

Azerbaijan Technologies produces high-tech systems for the monitoring of power distribution devices. This company is the first and only producer of partial discharge (PD) measurement systems in Iran and up to now, it has introduced two important products in this field that are appreciated by the regional electrical companies for their functionality in the real tests

ACHIEVEMENTS

2019:

Introduction of the first Iranian Partial Discharge (PD) measurement system

2020:

Introduction of the portable PD measurement system

2021:

The company was approved as a first-grade science-based company by the Iran ministry of science and technology

PRODUCTS

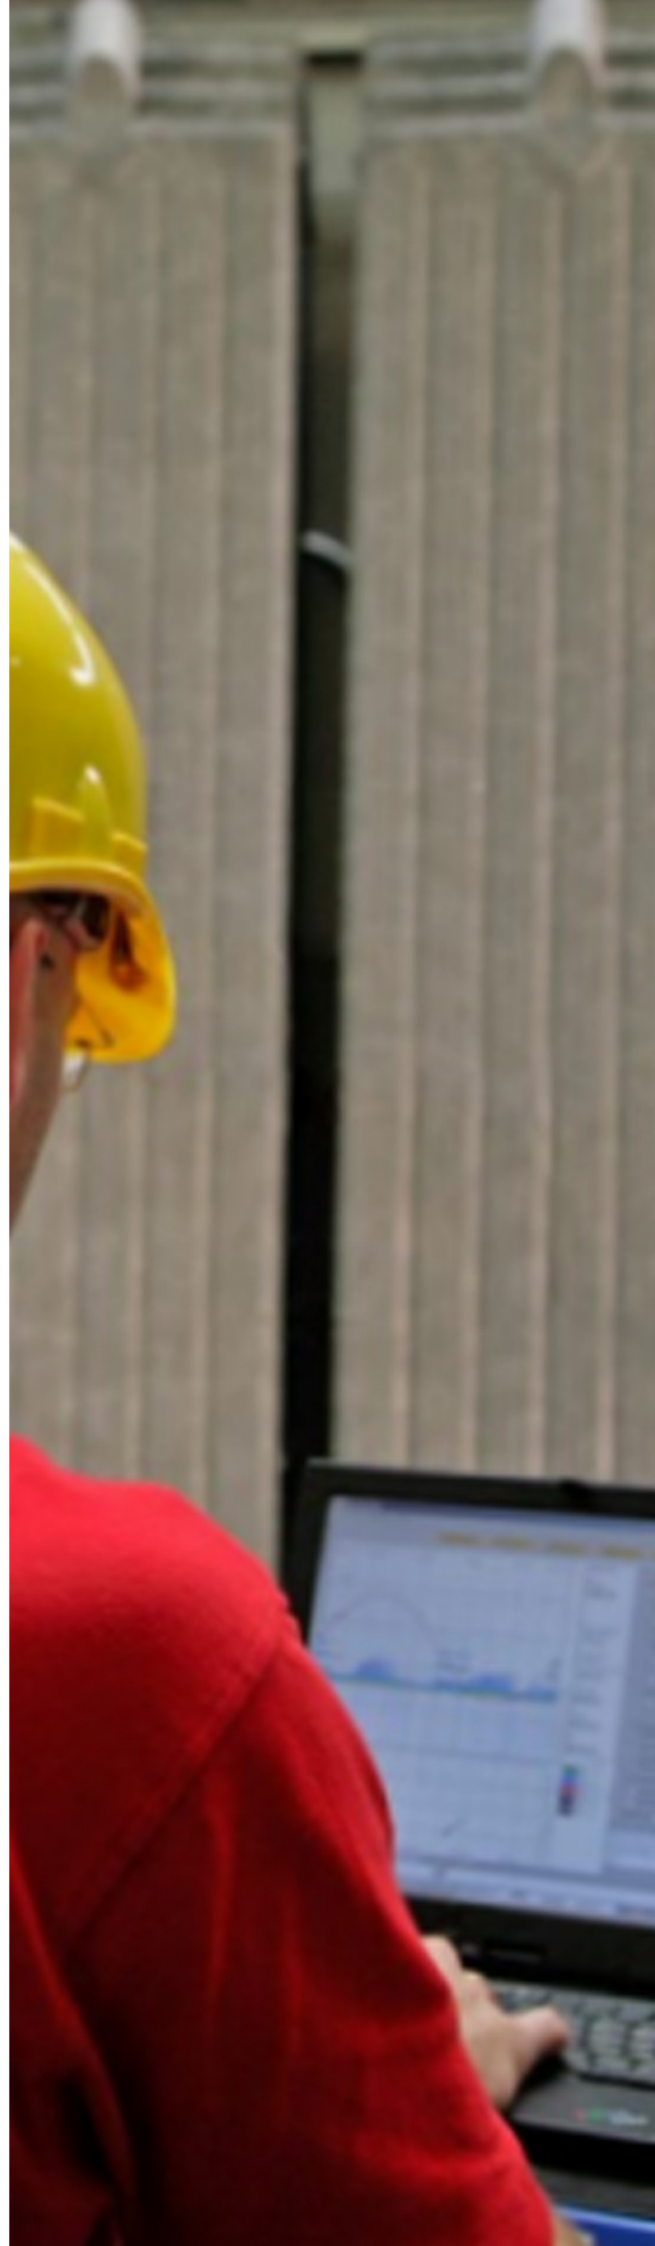

PDCam:

PDCam is a versatile portable PD measurement device used for online monitoring of the power distribution devices.

PDMA:

PDMA is a fixed PD measurement and analysis system used for monitoring of the power devices in the field or in the laboratories.
