

## *eWave 16,32,64 channel Wireless ERP,QEEG & EXG Recording System*

*eWave makes ERP/QEEG Recording easy and enjoyable*

The eWave is a small and high-tech system for recording of ,EXG ( EEG, ECG, EMG, EOG, ERG) Signals in Biofeedback and neurofeedback applications. eWave amplifies bio signals by advanced and low noise amplifier and collects it by a 4 channels of 24bit ADC 1K sample per second DC coupled amplifiers let record signals from 0Hz to 500Hz, including EEG, ECG, EMG, EOG and other DC signals. eWave transfers data to computer by Bluetooth wireless technology Powerful Biofeedback software The eWave comes with the flexible and user friendly eLife software, It offers clinicians and researchers lots of protocols for different type of treatment and research strategies .

### eLife

The eWave comes with the flexible and user friendly eLife software. It offers clinicians And researchers lots of protocols for different types of Treatment and research strategies
