### **Visual Brain**

V 1.00

Visual Brain is a wearable, 24-bit EEG amplifier (available with 8, 16 and 32 channels). As it is wireless and allows you to store your recorded data internally, visualizing brain activity and with Full compatibility with all our active and passive electrode systems.

EEG Signals Display

Up to 32 EEG Channels

Customizable Headset

Treatment Process Monitoring

Video Game Training

Portable Wireless/Wired

#### **Best Balance**

### V 1.15

Best device for performing balance assessments and interactive balance training to improve patient's coordination and reduce their fall risk.

Biofeedback Training

Static Balance Measurement

Video Game Training

Treatment Process Monitoring

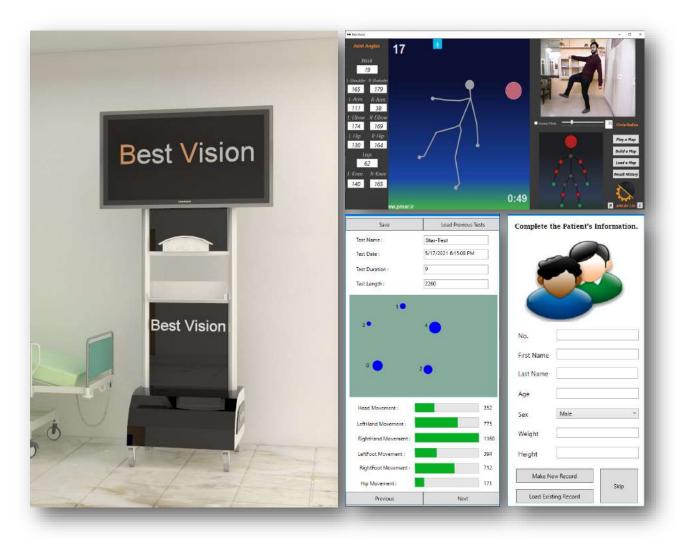

Doctor Created Tests

Foot Weight Ratio

#### **Best Vision**

V 2.03

Best tool for measuring and visualizing body movements and rehabilitation through imaging system.

Body Link Model Visualization

Body Joint Angles Display

Biofeedback Training

Treatment Process Monitoring

Doctor Created Tests

Muscle Movement Comparison

#### **Neuro Vision**

■ V 1.02

A perfect brainwave-reading EEG headset, measuring brain signals, visualizing brain activity and featuring brain-controlled game-based training.

EEG Signals Display

Video Game Training

Attention and Meditation Measurement

Treatment Process Monitoring

Single Electrode Headset

Blink Based Applications

#### X-EMS

## ■ V 1.01

X-EMS, Electrical Machine training and stimulating all the major muscle groups at the same time, helping you achieve a fit and toned look.

By training with X-EMS, a wireless electro muscle stimulation (EMS) device, whole muscle system of body gets involved, so you can achieve the results of a 90 minute workout in only 20 minutes!

Freely movable pads with anti bacterial, light and resistant material

EMS fitness special suit

Stimulation channels covering main 24 muscle groups

Multi-user adjustable programs

2650 mAh Battery with USB Type-C fast charging

Light weight High comfort

## **Digital Contact Thermometer**

#### **■ CTEMP**

- Temperature accuracy 0.08°C
- Waterproof
- Buzzer when measurement is done
- One minute measurement
- Temperature measurement in 3 methods: Oral, Axillary, Rectal
- Flexible Tip
- Auto shutdown
- Save the recent temperature reading

#### **Non-Contact Infrared Thermometer**

## **■** OTEMP

- Medical grade
- Temperature accuracy 0.2°C
- Temperature measurement range 5-10 Cm
- Less than 1 second measurement time
- Automatic shutdown
- Backlight
- Fever Audible alarm
- 32 Recent history data

#### **Non-Contact Gun Thermometer**

## **■** GTEMP

Fever Audible Alarm

Backlight

Auto Off

Precise Measurement 0.2°C

Multi Unit

32 History Data

## Wall Mounted Infrared Thermometer

## **■ STEMP**

Accuracy	± 0.2 °C
Alarm	High temperature audio alram and optical warning
Measurement Mode	Body (Forhead, Hand) / Environment
Power Supply	USB / Li-Ion Battery
Measurement Distance	15 Cm
Shutdown Mode	Auto ShutDown
Unit of Measurement	°C / °F
Temperature Measurement Range	± 0.2 °C

## Fingertip Pulse Oximeter

**■ PO-2** 

Audible Alarm

Finger Fit

Auto Off

Medical Level Accuracy

Display Rotation

Fast Measurement

### **Upper Arm Blood Pressure Monitor**

## Arun S7

2 X 99 Memories

Irregular Heart-Beat Detector

Large Screen Display

Color Based Result

Accurate Measurement

Keep Still Indication

Cuff Wearing Detection

Convenient Foldable Bracket (25° - 50°)
