

Water nuclease-free

Biology grade

Cat No: DP9021

Description

The water nuclease-free is deionized and 22 µm membrane filtered. This is suitable for use in all molecular biology applications.

Feature

Free of endodeoxyribonucleases, exodeoxyribonucleases, ribonucleases and phosphatases.

Quality control

The absence of endodeoxyribonucleases, exodeoxyribonucleases, ribonucleases and phosphatases is confirmed by appropriate Quality test.

Storage at: -20°C
