FanAzma Gostar

Best technology
for your laboratory

About us:

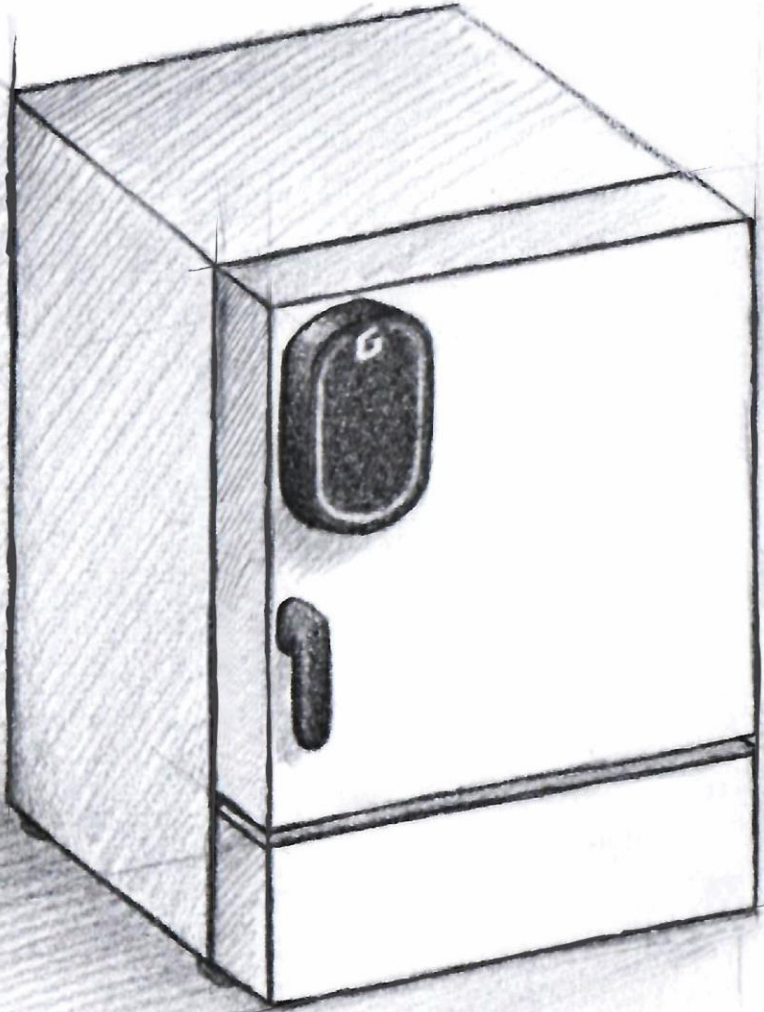

FanAzma Gostar was founded in early 1996 with the aim of producing laboratory equipment, and after receiving various certifications such as the clearance of the Ministry of Health and Medical Education and the international certificates ISO13485 and ISO9001, FG is now one of the most reputable manufacturers in Iran. The company's many years of experience as the leading oven manufacturer in Iran soon led to it becoming one of the foremost manufacturers of laboratory equipment, attracting consumers' attention by producing distinct and diverse products. The company's innovation led to its success in inventing water distillers with no water loss for the first time in the world. Receiving management and quality certificates from major global and domestic organizations was another achievement for the company. In early 2011, the company took a major step in the production of new and varied products with the construction of a new factory in Nazarabad Industrial Park. Constructed on a land with an area of 4,000 square meters, the factory employs state of the art machinery and is now one of the largest manufacturers of laboratory equipment in the Middle East, producing more than 70 pieces of laboratory equipment. Decades of experience and precision engineering in development and production as well as collaboration with academic and research centers have distinguished FG products from the existing examples on the market.

With a quick look at our products, you will also notice that all of our products have distinctive features that have ultimately brought nothing but comfort, exemplary durability, high accuracy, and unique beauty for the satisfaction of our customers. Now, with many years of experience, we are one of the leading manufacturers of laboratory equipment, and our products are distributed not only in Iran, but also in other countries. We owe these achievements to our hardworking staff, the technical knowledge of our managers, the utilization of cutting edge machinery, the use of high quality raw materials, and the constructive suggestions of our customers.

1996: Establishing FanAzma Gostar Company
1996: Receiving the certificate of industrial activity from the Ministry of Industry

FanAzma Gostar

Best Technology
For Your Laboratory

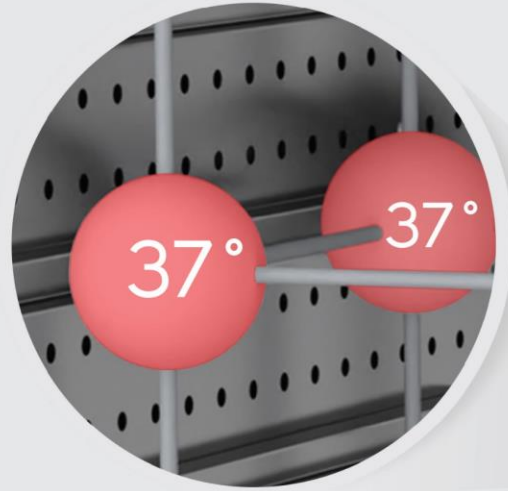

FG studio
We know what
you want

Technologies & innovations:

We solve your problem with our special innovations

HCT

Uniform & precise

- Stable and reproducible temperature, humidity and climate conditions
- Rapid heating up and recovery time
- Uniformity@27 points

Dual Safety

Dual Safety

Your sample's guard

- Independent safety device
- Two controller & sensors
- According to DIN12880

Guaranty

Guaranty

2 years guaranty
10 years after selling services

Products & contents:

Stability test chamber

Growth chamber

Hot incubator

Cold incubator

Shaker incubator

Laboratory drying oven

Orbital shaker

Electric muffle furnace

Chiller circulator

HCT

Dual Safety

Laboratory Drying Oven Fast & accurate up to 300°C

- Independent safety device thanks to dual safety technology
- Uniformity@27points thanks to HCT technology
- Up to 300°C
- Different sizes
