BORJ SANAT

## Rota-Rod Rat

### Features:

- Detection of falls
- Adjustable rod speed
- Individually timed test lanes
- Automatic recording of the animal latency-to-fall

Website: [www.BorjSanat.ir](http://www.BorjSanat.ir)

Email: [info@borjsanat.ir](mailto:info@borjsanat.ir)

Tel: (98) (21) 66580888

(98) (21) 66434200

## Specifications:

Dimensions	45 (w) x 49 (d) x 53 (h) cm
Revolving Speed	5 - 45 rpm
Display	Date, Time, Revolving Speed, Cut-Off Time, Lapse Time of Each Channel (3 digit)
Weight	15.50 Kg
Power Requirements	220V 50/60 Hz

## Definition:

Rota-rod test in rats: this test is used to measure how long animals can stay on a rotating rod without falling off and thus to determine the effect of test substances on mobility.
