

Nano colloids

Copper nano colloid (Cu)

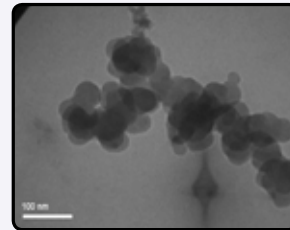

Specifications:

Purity (%)	Average particle size(nm)	Morphology	Color	Available dispersed concentration
+99	30-50	Spherical	Black red	1000-4000 ppm

Also available in engine oil, Glycerin, Gelatin, ...

Applications:

- Capacitor materials
- Catalysts
- Conductive coatings
- Conductive inks
- Conductive pastes
- Facial spray
- Lubricant additives

Iron nano colloid (Fe)

Specifications:

Purity (%)	Average particle size(nm)	Morphology	Color	Available dispersed concentration
+99	20-70	Nearly Spherical	Black	1000 ppm

Applications:

- Waste water remediation
- Catalysts
