

JIKAN

*Surface Nano-Engineering
Knowledge-Based Company*

SANDBLAST MACHINE SBM-10

- An ideal machine for blasting.
- Pressure regulator to accurately control the input pressure.
- Efficient sand collector and automatic abrasive recycling system.
- Ease of handling.
- Interior lighting.

Jikan Company, No. 111, Building No. 2, University of Tehran Science and Technology Park,
North Kargar St., Tehran, Iran

SBM-10

Sandblast Machine

- **Jikan SBA-10** Can be used for sand glass, sandblasting, surface polishing processing, machinery parts, such as surface cleaning, rust removal and glass, aluminum alloy and other decorative surface sandblasting, marble engraving.

Technical Data

Compressor size	500 L
Working pressure	0.2–8 bar
Usable abrasives	<ul style="list-style-type: none">• Silica• Any slag types• Garnets• Aluminum oxide• Steel Shot & Steel Grit
Device spray control	Manual trigger on gun
Air filtering	DeepCool XFAN 80 Case Fan
Mass flow rate in air filter	1000 m ³ /h
Abrasive spray system	Under pressure (dry)
Moving the spray nozzle	Manual
Interior size of cabinet	<ul style="list-style-type: none">• Width: 620 mm• Depth: 500 mm• Height: 700 mm
Abrasive capacity	8 L
