

Permeability Plugging Apparatus

This apparatus is as two setups: permeability plugging apparatus and HPHT filter press!

The design of the setup is to measure these two mentioned tests.

The setup is applicable for drilling fluid and cement tests based on API procedure.

Specification

- ✓ Pressure Range: up to 5000 psi
- ✓ Temperature Range: up to 200° C
- ✓ Transmitter Accuracy: 0.1 range
- ✓ Stainless Steel Cells
- ✓ Two Brief Cases for Cells Handling
- ✓ Native Core Sample is Feasible to be tested
