

## QTH-NKS-03 High Pin Count QTH Module 2- Channel 14-bit ADC 80MSPS

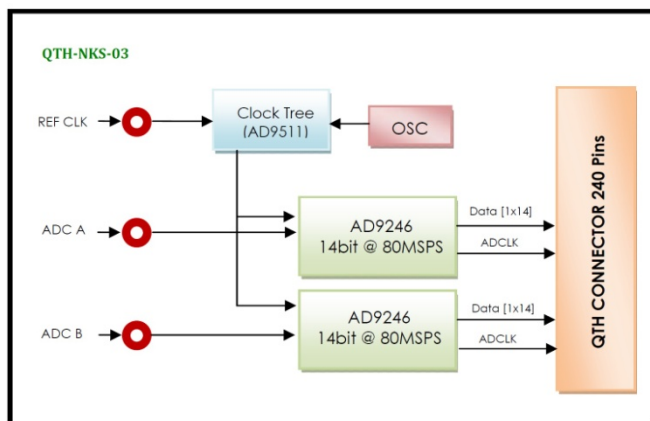

### Description

The QTH-NKS-03 is a dual-channel 14-bit ADC at 80MSPS that enable simultaneous and high speed sensitivity. This module was designed based on one-channel AD9246 ADC of Analog Device Company with LVCMOS outputs. The clock sampling can be provided from an external or internal source and then send to distribution clock unit. This module can use on every carrier card which follows the QSH/QTH standard; therefore it can have the maximum data throughput and minimum latency.
