

FMC-NKS-V106- A High Pin Count FMC and QSH Carrier Virtex-6 Processing Card

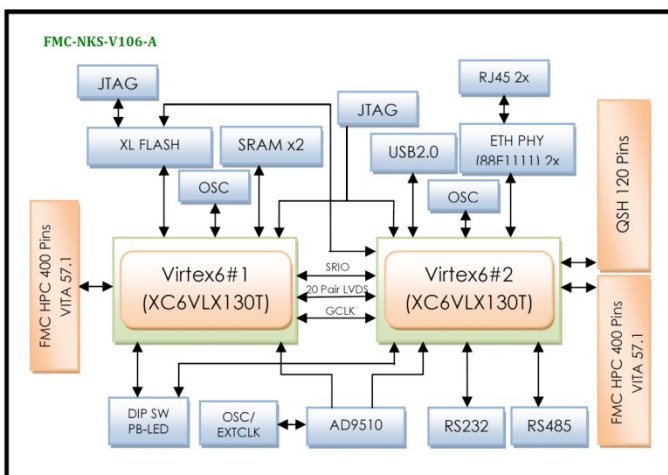

Description

The FMC-NKS-V106-A is a high performance FMC industrial carrier card based on the Xilinx Virtex-6 LX130T FPGA family. Communication with host computers on this board via two Ethernet 10/100/1000 enables users to control the card, modify algorithm settings and process real-time signals. The on-board FPGA Mezzanine Connectors (FMC) can make a high-bandwidth data transfer channel with VITA 57.1 standard modules. There is also 2x 4-bank QSH and 2x 2-bank QSH connector on this platform.
