Acceleration Logger

Suitable for laboratories and industrial-research applications

Overview :

This data logger with integrated accelerometer can be used for measuring and logging vibration signals while also DC acceleration for industrial and research applications.

Features :

- Triaxial Accelerometer
- DC Response MEMS
- Measuring Range : $\pm 16/70/200g$
- 13bit Resolution
- Sampling Frequency : 3200Hz
- Data Storage on 8GB Micro SD
- Micro-USB Interface for Data Download & Battery Charging
- Rechargeable Battery
- Battery Status and Data LED Indicator
- Dimensions : 75*31*20mm
- Weight : 50gr
