DIP COATING MACHINE DCM-10

- A Flexible Choice to Conduct Various Kinds Of Dip Coating
- Easy To Install Samples And Easy To Set Height
- Offers a wide range of Speeds
- Programmable Interface
- Robust and Resistant Body
- Low Noise and Vibrations

Jikan Company (Knowledge-Based), No. 111, Building No. 2, University of Tehran Science and Technology Park, North Kargar street, Tehran, Iran

DCM-10

Dip Coating Machine

- **Jikan DCM-10** is a laboratory dip coater, used for coating samples in an easy, fast, reliable and repeatable way. The device offers a wide range of speeds and delay times and could be programmed with desired cycles.

Technical Data	
Maximum Dipping/ Withdrawal Speed	100 mm/s
Minimum Dipping/ Withdrawal Speed	0.1 mm/s
Maximum Carrying Weight	300 gr
Maximum Travel Distance	100 mm
Built-in Software Features	99 Cycles 10 Saving Slots Adjustable Dipping speed, Withdrawal speed, Up and Down Stop Times
Power	AC 220V 40W
Dimensions	- Width : 110mm - Height : 280mm - Depth : 110mm
Free grippers Included	- 3 sample gripper - 4 sample extralong gripper - extra long gripper
Weight	5 Kg
