ART-DL64T

ARTIMAN 64 Channel Temperature Data Logger

The ART-DL64T is a temperature data logger which can acquire temperature data and stream it to laptop.

This device offers significant economy, unique features and versatility in a rugged and easy-to-use package for field usage.

Key Features:

- Stand-alone operation
- Easy to use
- Precise and reliable
- Direct stream to laptop
- Excellent compactness and rugged package

Technical specifications:

- 64 channel inputs for thermocouple type K.
- Cold junction temperature compensated.
- 12-bit resolution – 4 sample/sec/channel.
- 0.25 centigrade degree accuracy.
- Measurement range: 0 to 1024 centigrade degree.
- Data recording to laptop drive.
- Wi-Fi interface with laptop.
