

# API Filter Press

## Description

This apparatus measures drilling fluid and cement filtration at ambient condition based on API procedure. It is also applicable to check the wall-building (filter cake) properties of drilling mud and cement slurries using a filter paper.

## Specifications

- Designed based on API Recommended Practice 13I.
- Working temperature: ambient.
- Working pressure: 100 psig.
- Stainless steel cells.
- Filtration diameter: 9 cm.
